HJALMAR HACH & LORENZO SILVA
RAILROAD™
ink

DEEP BLUE EDITION

COMPONENTS

6 MARKERS

4 ROUTE DICE

6 BOARDS

2 RIVER DICE

2 LAKE DICE

GAME OVERVIEW

A game of *Railroad Ink™* is played over **7 rounds**. The goal is to **connect** as many **Exits** ⬆ to each other as possible by **drawing Routes** that can create **Networks**. The more Exits ⬆ you connect to the **same Network**, the more **points** it will be worth. **Bonus points** can be earned for your **Longest Railway**, your **Longest Highway**, and by drawing on the **Central Spaces** of your Board.

SETUP

1. Each player takes a **Board** and places it in front of them.
2. Each player also takes a **marker**.
3. Place the **Route dice** in the middle of the table.
4. The **River and Lake dice** are only used in the Expansions (see page 10).

GAME ROUNDS

At the beginning of each round, the **Route dice** are rolled **once**. The results of the roll will determine which **Routes** all players **must draw** that round. After the roll, all players play **simultaneously**, drawing the Routes rolled on their own boards.

ROLLING DICE

Take the Route dice and **roll them** in the middle of the table. Place the dice so they are **easily visible** to all players.
There are 2 kinds of Route dice.

3 dice show these 6 kinds of Routes:

Straight Highway

Straight Railway

Curved Highway

Curved Railway

T-junction Highway

T-junction Railway

— ◇ —

1 die shows these 3 kinds of Routes:

Overpass

Straight Station

Curved Station

Note: **Stations** allow you to **connect** a Railway Route to a Highway Route. **Overpasses** allow the two to cross **without being connected** to each other.
Hint: To more easily keep track of the Routes you have to draw, you can use the **dice reference** on your board to **mark the available Routes**, if you so desire.

DRAWING ROUTES

After the dice roll, all players must draw the **Routes** on their boards **at the same time**. There are a few **drawing rules** you need to follow:

1. Each Route you draw must be **connected by at least one side** to either one of the **Exits** 🔺 or a preexisting Route. If you **can't connect** a Route, you can't draw it.
2. You **must** draw **all** 4 Routes shown on the dice each round (if possible, and each Route showing can only be drawn **once**, of course).
3. You **can't draw** Routes in a way that **directly connects** Railways to Highways or vice versa (you need a **Station** to do that).

> **Important**: When drawing Routes, you can freely **rotate** and/or **reverse** the pattern you see on the die.
USING SPECIAL ROUTES

Each player can also use **6 Special Routes**, displayed in the **top part of the boards**, that **do not appear** on the Route dice. These Routes may allow you to **connect different Networks** together and/or make bigger Networks.

You may draw a Special Route **once per round**, in addition to the Routes shown on the Route dice, but you may use each Special Route only **once per game**. After you use a Special Route, you must **mark it off** on your board as a reminder that you can't use it again.

Also, you can only use **up to 3** Special Routes during the entire game (and remember, only **1 per round**).

Remember: Only 1 Special Route per round, and only up to 3 per game!

END OF THE ROUND

Once all the players have drawn all of the available **Routes**, the round ends.

Each player must **mark the spaces** where they drew Routes this round by writing the **number of the current round** in the white boxes of each space they drew on. You can **never erase** the Routes you drew in a previous round.

After that, **roll** the Route Dice to start the **next round**.

Example: The end of the 5th round.

END OF THE GAME

The game ends after the **7ᵗʰ round**. Now it's time to count your score! Each player counts the points they earned for their **connected Exits** 🔺, their **Longest Railway** and **Longest Highway**, and the **Central Spaces** they drew on, **marking their points** on the designated spaces of the **Scoring Table** on their boards. For more details, see the next page.

Then, each player must check for **incomplete Routes**. Each **end** of a Route that **does not connect** with any other Route or the **outer edge** of the board counts as an Error. Mark each one of these Errors with this symbol: ⊗. You **lose 1 point** for **each Error** on your board. Mark these penalty points on the matching space of your Scoring Table.

***Note**: If you are playing with an Expansion* ⭐ *(see page 10), mark any additional points on the expansion space of your scoring board.*

Finally, **add up** all the points you earned (**subtracting** any points from Errors) and write your total score on your Scoring Table. The player with the **most points** wins! In case of a tie, the winner is the player with the **fewest Error marks** on their board. If they're still tied, the victory is **shared**.

HOW TO SCORE POINTS

CONNECTING EXITS ⬆

Connecting Exits ⬆ is the main way to score points in *Railroad Ink™*. At the **end of the game**, each **set of Exits** ⬆ that are connected to each other via the same **Network of Routes** is worth a number of **points** determined by the **number of Exits** ⬆ connected together, as shown on the **Network Values** on your Board.
*Note: **Overpasses** only allow you to make two of your Networks **cross each other**, but they don't create a connection between the two.*

*Note: You can use **Stations** to connect **Railway Routes** and **Highway Routes** to each other.*

Network Values

⬆	2	3	4	5	6	7		⬆ 32
	4	8	12	16	20	24		

Example: *Dagmar's board at the end of the game has 2 Networks. One (A) connects a total of 4 Exits and is worth 12 points. The other (B) connects 6 Exits and is worth 20 points. They score 32 points for their Networks!*

BONUS POINTS

While the points you get for **connecting Exits** ⬆ may end up being the bulk of your score when you add up points at the end of the game, do not underestimate the importance of the **bonus points** you can earn from your **Longest Highway**, **Longest Railway**, and **Central Spaces**.

Your **Longest Highway** is the **longest unbroken streak** of **adjacent spaces** where you drew **Highway Routes** that are **connected to each other** (not counting any branches), such as the route marked in blue to the right. You **score 1 point for each space** that makes up your single longest Highway branch. Stations **do not interrupt** your Highway. This example show a Longest Highway of 7 spaces.

Your **Longest Railway** is determined the same way as the Longest Highway, only counting **Railway Routes** instead of Highway Routes, like the one marked in red to the right (worth 5 points).

Your **Central Spaces** are the 9 spaces in the middle of your board. You score **1 point** for each **Central Space** you drew anything on.
*If you have two Longest Routes (with the same number of spaces), **only 1 counts** towards your final score.*
*If you should count a space you already counted to proceed, your Longest Route is interrupted.*

EXPANSIONS ★

Once you feel confident enough with the ins and outs of *Railroad Ink™*, you can spice things up by using 1 of the 2 **optional Expansions** included in this box.

If you play with an expansion ★, you must roll **the respective Expansion dice** along with the 4 Route dice at the beginning of each round. In addition, the Expansion may change the **number of rounds** you must play and give you **new ways to score points**.

During the game, follow the **same rules** as the regular game with a few **changes**, as described on the following pages.

At the end of the game, when you **add up your score**, remember to count the points you earned from the **Expansion ★** you're using, and mark them in the designated space of your scoring table.
RIVER DICE

Rivers are a **third kind of Route**. Sort of. They can't be used to connect Exits, but they can be connected to each other to **create a River**. Rivers **can't be crossed** by Highways or Railways, unless a **Bridge face** on a River die allows you to do so. The additional goal is to make the **Longest River possible**. When playing with the **River Expansion** ⭐, apply these **changes** to the regular game rules:

◇ The game only lasts **6 rounds**.
◇ When you draw Routes, you **do not have** to draw **any** of the River dice if you don't want to (you still have to use all 4 Route dice).
◇ The Rivers you draw **don't have** to be **connected** to preexisting Routes and/or other Rivers.
◇ You **can't connect** River Routes with other kinds of Routes (nor other Exits 🔺).
◇ When checking for **Errors**, each end of a River that **does not connect** to another River or the outer edge of the Board **counts as an Error**.
◇ At the end of the game, choose 1 of your Rivers. You gain **1 point** for **each space** the River runs through. If **both ends** of the River are connected to the outer edge of the board, you get **3 additional points**.
Example: *Diana created 2 River Routes. The longest would be worth 7 points, but its ends are not connected to the edges of the Board. Instead, the shortest one is worth 8 points: 5 for its length plus 3 extra points for having both ends connected to the edges of the Board, so she chooses to score points for that River.*

⭐ *8*

RIVER ROUTE FACES

BRIDGE FACES

LAKE DICE

Lakes have **two advantages**. First of all, they allow you to create bigger Networks by connecting your Routes to a Lake with the **Pier faces** on the Lake dice. You also score **additional points** for the **Smallest Lake** on your Board. When playing with the **Lake expansion** ★, apply these **changes** to the regular game rules:

◇ The game only lasts for **6 rounds**.
◇ When you draw Routes, you **do not have** to draw **any of** the Lake dice, if you don't want to (you still have to use all 4 Route dice).
◇ The Lakes you draw **don't need** to be **connected** to pre-existing Routes and/or other Lakes.
◇ If a space has **3** sides adjacent to the **open sides** of Lakes, it **must** be completely **filled with water** immediately.
◇ Open Lake sides **do not count** as Errors at the end of the game.
◇ Networks connected to the **same Lake** (by Piers) are also connected to **each other**.
◇ At the end of the game, you get **1 point** for each space occupied by your **Smallest Lake**.

Example: The bigger Lake would be worth 7 points, but since Harry also made a smaller one, he only gets 3 points. At the same time, the Smallest Lake allowed him to join two small Networks into a single one with 4 Exits, which is worth 12 points!
